

Consent Form

I understand that during the performance of my pet's surgery or dentistry unforeseen conditions may be revealed that necessitate an extension to or variation from the procedure for which he/she is being admitted. I expect the veterinarian to use reasonable care and judgment in performing the procedure(s).

The nature of the procedure and the risks involved have been described to me, and I realize results cannot be guaranteed. I am also aware that unforeseen events resulting from the procedure will not relieve me from any obligation to all reasonable costs incurred regarding my pet.

Pre-anesthetic Testing

At Greenfield Animal Hospital we use proven techniques and the safest anesthetics available. Prior to any procedure, we perform a thorough physical examination of your pet and carefully monitor him/her during anesthesia and through recovery. Some pre-existing conditions cannot be determined by physical exam. Laboratory analysis can give us a more complete picture of your pet's internal organ function and allow us to tailor anesthetic choice and route of administration (placement of an intravenous catheter, for example) to your pet's specific needs.

Recommended for animals younger than 7 years of age is a pre-anesthetic Mini-profile, which assesses red blood cell capacity, liver and kidney function. For pets 7 years or older, the General Health Profile covers the same values and also includes a more thorough assessment of pancreatic and general metabolic function.

Laboratory Testing Waiver

You have read the above descriptions of the pre-anesthetic laboratory testing strongly recommended by the veterinarians at GAH. (By choosing option 3, you are declining the recommended blood work.)

_____ Mini-profile and packed cell volume (\$64). (Birth to 6 years of age)

_____ General Health Profile and packed cell volume (\$87). (7 years or older)

_____ I decline pre-anesthetic blood screening for my pet, but request that you proceed with anesthesia. I understand that a medical condition may exist, and my pet's health could be at risk if the condition goes undetected before he/she is anesthetized.

Microchip Consent

At Greenfield Animal Hospital we strongly recommend microchipping for all pets, no matter what the age. It is a safe, simple and permanent form of identification designed to quickly identify lost pets and reunite them with their owners. It is a **PROVEN** way to successfully recover your pet if it ever becomes lost.

_____ I would like to have my pet microchipped. (\$88.25 includes first year's registration)

_____ I decline microchipping.
